

## Classification

Graded Quiz • 6 min

Due Aug 30, 12:29 PM IST

1. Which of the following examples is/are a sample application of Logistic Regression? (select all that apply)

3 points

- ☒ The probability that a person has a heart attack within a specified time period using person's age and sex.
- ☒ Customer's propensity to purchase a product or halt a subscription in marketing applications.
- ☒ Likelihood of a homeowner defaulting on a mortgage.
- ☐ Estimating the blood pressure of a patient based on her symptoms and biographical data.

2. Which one is **TRUE** about the kNN algorithm?

3 points

- ☐ kNN is a classification algorithm that takes a bunch of unlabelled points and uses them to learn how to label other points.
- ☒ kNN algorithm can be used to estimate values for a continuous target.

3. What is "**information gain**" in decision trees?

3 points

- ☐ It is the information that can decrease the level of certainty after splitting in each node.
- ☒ It is the entropy of a tree before split minus weighted entropy after split by an attribute.
